ISAT 2026 Scale Score to Percentile Rank

Percentile Rank. A “percentile rank” tells the percentage of scores in a distribution that are the same as or lower than a given student’s score. For example, Jane’s score of 2529 on the Spring 2026 5th grade mathematics test has a percentile rank of 57. This tells us that 2529 was the same as or higher than 57 percent of the scores in the distribution, or that Jane’s performance was the same as or better than 57 percent of the students who took the test. This definition holds both for an individual student’s score and for a group’s average score (e.g., classroom, school, or district).

Percentile Rank Descriptors. Test publishers have long used common language descriptors like those displayed in the table to describe percentile ranks to promote understanding, use, and discussion of student assessment scores:

Percentile Rank	Common Descriptor
96-99	Very High
89-95	High
77-88	Above Average
60-76	High Average
41-59	Average for Grade Level
24-40	Low Average
12-23	Below Average
5-11	Low
1-4	Very Low

Individual Student Score, 2026

John has a score of 2459 on the fourth-grade English Language Arts test. The Grade 4 conversion table shows that John has a percentile rank of 47. This percentile rank tells us that John scored the same as or higher than 47 percent of Idaho’s fourth grade students who took the test in 2026. John’s performance may be described as “average for grade level.”

Group Average Score, 2026

An algebra class has an average score of 2645 on the eighth-grade mathematics test. The Grade 8 conversion table shows that the class has a percentile rank of 75. This percentile rank tells us that the “average student” in the algebra class scored the same as or higher than 75 percent of Idaho’s eighth graders who were tested in 2026. The class performance may be described as “high average”

The State Department of Education provided Idaho statewide scale scores from the ISAT 2026 assessment that were used to calculate the percentile ranks in this document, namely the number of students with valid scores, the state mean and the state standard deviation for each test (i.e., English Language Arts, Mathematics, and Science) at each grade level tested.

Each percentile rank (1 to 99) was calculated: $pr = (z\text{-score} \times \text{standard deviation}) + \text{mean}$, where the z-score was retrieved from a *Proportions of Area under the Normal Curve* table, which is included in the Appendix of Tables of most statistics textbooks.

Caution. Since percentile ranks are not on an equal interval scale, they cannot be averaged using ordinary arithmetic, nor can they be graphed as an equal interval scale such as Excel provides.

ISAT Composite Percentile Rank for English and Mathematics

The instructions below illustrate how to compute a
“composite score” for a student’s ELA and Math scores.

ISAT Spring: 2019	Grade: 3	English	-	Mathematics	-	ISAT Composite
Pupil: Till Eulenspiegel						
Scale score for English and Mathematics		2526	-	2448	-	
Percentile rank (PR) for English and Mathematics		86	-	55	-	
Normal curve equivalent (NCE) for English and Mathematics (see table below)		72.8	-	52.6	-	
Average of the English and Mathematics NCEs (72.8+52.6)/2			-		-	67.7
Percentile rank for the average (AVG NCE) (see table below)			-		-	80
Percentile Rank		86	-	55	-	80

PR	NCE	AVG NCE	PR	NCE	AVG NCE	PR	NCE	AVG NCE	PR	NCE	AVG NCE	PR	NCE	AVG NCE
