

Idaho NAEP Average Scale Scores from 2003 to 2024 Reading and Mathematics, Grades 4 and 8

Bert Stoneberg, Ph.D.
K-12 Research Idaho

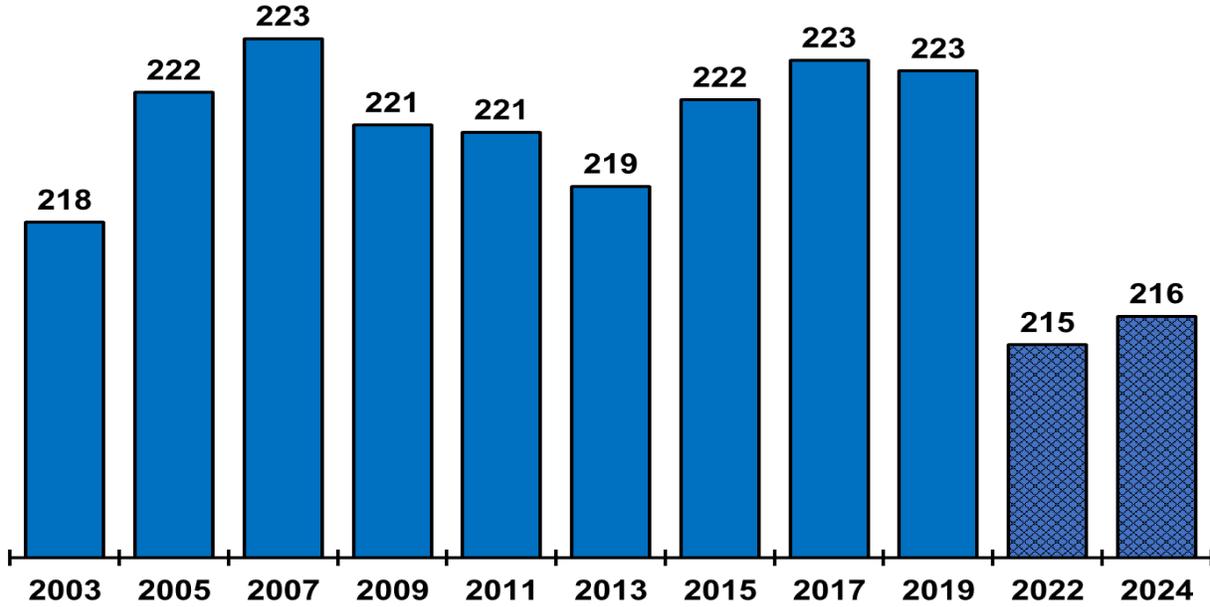

This document presents Idaho's NAEP results over 21 years, starting from when all states agreed to let their fourth and eighth graders participate to receive funding from the No Child Left Behind Act. The last two data points follow the COVID panic and school shutdowns. There are no narratives here suggesting what the data might mean for Idaho's education. Whether you are with the state, district school board, district administration, principal, teacher, parent, or news reporter, you might want to write down your observations about the data (there may be some discussions).
